- Respect any posted ranch road closures

Deseret CWMU Description

The Deseret CWMU takes up parts of Weber, Morgan and Rich counties, with Rich county having the most area. The higher points on the Deseret CWMU are along Horse Ridge (**8500 feet**). On the west the Unit drops away to about **6400 feet** in the south and 8000 feet in the north. On the eastside of Horse Ridge the Unit makes a less steep drop, dropping down to around 6400 feet in the north and 6800 feet in the south along the Utah - Wyoming state border.

The Deseret Cooperative Wildlife Management Unit (CWMU) is much larger than other CWMUs in Utah, therefore land cover is more diversified. About half (50%) of the land cover on the Deseret CWMU is Inter-Mountain Basins Montane **Sagebrush Steppe** (62). Towards the northeast and at lower elevation, there are large areas of Inter-Mountain Basins **Big Sagebrush Steppe** (66). The higher elevations on the west of the Unit, mixed with Sagebrush Steppe are extensive areas of Rocky Mountain **Aspen Forest and Woodland** (22). At lower elevations towards the northeast are several patches of **Agriculture** (114) land. At minor extents are Southern Rocky Mountain **Montane-Subalpine Grassland** (71), Inter-Mountain Basins **Big Sagebrush Shrubland** (48), and rocky Mountain Gambel **Oak-Mixed Montane Shrubland** (41).
